Human Rights In The Administration Of Justice United Nations. Office of the High Commissioner for Human Rights 2003-12-01
Independent legal professionals play a key role in the administration of justice and the protection of human rights. Judges, prosecutors and lawyers need access to information on human rights standards laid down in the main international legal instruments and to related jurisprudence developed by universal and regional monitoring bodies. This publication, which includes a manual and a facilitator's guide, seeks to provide a comprehensive core curriculum on international human rights standards for legal professionals. It includes a CD-ROM

containing the full electronic text of the manual in pdf format.

Bench Book National Labor Relations Board 2016-11-21 The Bench Book is designed to provide NLRB judges with a reference guide during trials when other resources are unavailable. However, it is also a useful tool for all trial practitioners before the Board. It represents an effort to set forth Board precedent and

other rulings and authorities on certain recurring procedural and evidentiary issues that may arise during an NLRB trial. It is not a digest of substantive law. Nor should it be cited as precedent, or be considered a substitute for issue-specific research. The Bench Book includes references to unpublished Board orders, unappealed administrative law judges' decisions, and other Board documents that are not binding precedent. It also includes citations to some of the two-Member Board decisions that issued from January 1, 2008-March 29, 2010, and the recess-Board decisions that issued from January 4, 2012-August 4, 2013. Note that this edition of the Bench Book includes a number of organizational changes from previous

editions. The most significant change is to former Chapter 13 (now Chapter 16) on Evidence. The chapter is now organized in the same way as the FRE, and follows the same numbering system, so that the federal rules and treatises on evidence can be cross-referenced more easily. Another significant change is that former Chapter 11 on Miscellaneous Procedural Matters has been deleted. The matters addressed there have been placed in other chapters, including four new chapters on Motions and Special Appeals (Chapter 10), The Hearing Record (Chapter 12), Board Precedent and Relitigation of Issues (Chapter 13), and Supplemental or Related Proceedings (Chapter 14).

Florida Administrative Practice The Florida Bar 2017-06-23
Florida Administrative Practice, Eleventh Edition is the only practice manual to provide an in-depth discussion of the procedural aspects of administrative litigation. The Administrative Procedure Act is a dynamic area of the law, and the new Eleventh Edition brings you up-to-date with the most recent statutory changes, including discussion of: New discussion regarding DOAH's centralized electronic database 2016 amendments to F.S. 120.57 Authority to reconsider and vacate prior final order in

disciplinary proceedings
Judicial Review Revised statutes and rules New case law In addition, the manual explores other areas of substantive law where administrative procedures predominate, including environmental and land use law and certificates of need determinations. With extensive case law and statute references, as well as an appendix featuring the full text of the APA with tracing and conversion tables, this reference will be a valuable addition to the library of experienced administrative law practitioners and those needing a trustworthy guide through this complex area of law.

Safe Drinking Water Act
directs the U.S.
Environmental Protection
Agency (EPA) to regulate
the quality of drinking
water, including its
concentration of radon,
an acknowledged
carcinogen. This book
presents a valuable
synthesis of information
about the total
inhalation and ingestion
risks posed by radon in
public drinking water,
including comprehensive
reviews of data on the
transfer of radon from

water to indoor air and
on outdoor levels of
radon in the United
States. It also presents
a new analysis of a
biokinetic model
developed to determine
the risks posed by
ingestion of radon and
reviews inhalation risks
and the carcinogenesis
process. The volume
includes scenarios for
quantifying the
reduction in health risk
that might be achieved
by a program to reduce
public exposure to
radon. Risk Assessment
of Radon in Drinking
Water, reflecting
research and analysis
mandated by 1996
amendments to the Safe
Drinking Water Act,
provides comment on a
variety of methods to
reduce radon entry into
homes and to reduce the
concentrations of radon
in indoor air and in
water. The models,
analysis, and reviews of
literature contained in

this book are intended to provide information that EPA will need to set a new maximum contaminant level, as it is required to do in 2000.
