King Arthur's Children Tyler R. Tichelaar 2010-01-31 Did you know King Arthur had many other children besides Mordred? Depending on which version of the legend you read, he had both sons and daughters, some of whom even survived him. From the ancient tale of Gwydre, the son who was gored to death by a boar, to Scottish traditions of Mordred as a beloved king, Tyler R. Tichelaar has studied all the references to King Arthur's children to show how they shed light upon a legend that has intrigued us for fifteen centuries. "King Arthur's Children: A Study in Fiction and Tradition" is the first full-length analysis of every known treatment of King Arthur's children, from Welsh legends and French romances, to Scottish genealogies and modern novels by such authors as Parke Godwin, Stephen Lawhead, Debra Kemp, and Elizabeth Wein. "King Arthur's Children" explores an often overlooked theme in Arthurian literature and reveals King Arthur's bloodline may still exist today. Arthurian Authors Praise "King Arthur's Children" "Author Tyler R. Tichelaar has

performed impeccable research into the Arthurian legend, finding neglected details in early sources and reigniting their significance. Great brainstorming fun! I am proud to add this to my personal collection of Arthurian non-fiction." --Debra Kemp, author of The House of Pendragon series "Tyler R. Tichelaar's in-depth analysis of the plausibility of King Arthur's children reaffirms the importance the King Arthur legacy continues to have for society and the need of people all over the world to be able to connect to and believe in King Arthur and Camelot." -- Cheryl Carpinello, author of Guinevere: On the Eve of Legend

Metals and How To Weld Them Theodore Brewster Jefferson 1962 The progress of man really started at the time he began to use metals. Until man became the master of metals life was hard, cruel and difficult. Many people seem to think these conditions of life have not changed very much. But do you realize how much easier life is because of metals? Without metals many products we know as common necessities would be impossible, while other items would be very unsatisfactory substitutes by present-day standards. Without metals our activities would depend on our ability to use wood and stone. Stone axes and hammers may have served the caveman, but they would not meet the needs of skilled craftsmen of today. With only stone and wood available as materials, practically all our modern conveniences would be non-existent. We would not have modern means of transportation—the automobile, ocean liner, train or airplane. Likewise, we would not have modern means of communication—the radio, telephone or television. In fact, we now depend so much on metals it is difficult to think of how we could live without them.

Reaver is a greywaster, living in a small block controlled by a distant ruler said to have started the Fallocaust.
