Sabella may not be undead, but she is painfully allergic to sunlight, possesses supernatural strength and speed, and feeds on fresh blood. In her youth, Sabella seduced a number of men, killing them all for fear of discovery. But with age comes control, and Sabella has sworn off of drinking human blood. After four years of staying clean, Sabella receives an invitation to her Aunt Cassi's funeral-along with several thousand credits to ensure she attends the reading of the will. But when Sabella arrives at the funeral, she discovers that the funds were a ruse. Before her death, Cassi-a devout Christian Revivalist-discovered the truth about Sabella and tasked her manservant, John Trim, to hunt Sabella down. Trim hires private investigator Sand Vincent to get close to Sabella and suss out the truth. But Sand is only human-and Sabella anything but. As Sand becomes enthralled by Sabella's charm, Sabella must combat her own instincts to keep him alive-and society's suspicions away.

Days of Grass Tanith Lee 2013-06-24 The free humans lived underground, secretive, like rats. Above, the world was a fearsome place for them - the open sky a terror, the night so black, and the striding machines from space so laser-flame deadly. Esther dared the open; she saw the sky; she saw the Enemy. And she was taken - captive - to the vast alien empty city. Surrounded by marvels of a science not born on earth, Esther did not know what they wanted of her. There was mystery in the city, dread in the heavens, and magic in the handsome alien man who came to her.

Why is it then that whenever some new problem swamps Susan's far from calm existence, she is driven to revisit the house? As when her mother takes up with the worrying Wizz. Or years later, at the end of a deeply-felt and broken love-affair of Susan's own. The house is always changing. As if at last it must achieve some irresistible transformation. Frankly, there is something uncanny about the house. Isn't there.

Quest for the White Witch Tanith Lee 2015-04-30 He called himself by the name of the father he had never known, Vazkor, king of a forgotten land. In his veins were mingled the blood of that regal warrior and that of his witch mother, the silver-masked, snow-haired survivor of the hated Old Race. He had sworn that she would die at his hands in the name of his father and all that his world had become. Across that barbaric and age-haunted planet his quest went relentlessly on. As he searched, so grew his own powers, his fearful heritage. Across wide seas, in conquered cities, and among haunted mountains, the hunt took him. And as he drew closer to his objective, the clearer became the way she must be slain, the more certain his ability to sunder all her witchcraft and ancient science to rid the world once and for all of his creator - the white witch from the volcano.

Introduction to AI Robotics, second edition Robin R. Murphy 2019-10-01 A comprehensive survey of artificial intelligence algorithms and programming organization for robot systems, combining theoretical rigor and practical applications. This textbook offers a comprehensive survey of artificial intelligence (AI) algorithms and programming organization for robot systems. Readers who master the topics covered will be able to design and evaluate an artificially intelligent robot for applications involving sensing, acting, planning, and learning. A background in AI is not required; the book introduces key AI topics from all AI subdisciplines throughout the book and explains how they contribute to autonomous capabilities. This second edition is a major expansion and reorganization of the first edition, reflecting the dramatic advances made in AI over the past fifteen years. An introductory overview provides a framework for thinking about AI for robotics, distinguishing between the fundamentally different design paradigms of automation and autonomy. The book then discusses the reactive functionality of sensing and acting in AI robotics; introduces the deliberative functions most often associated with intelligence and the capability of autonomous initiative; surveys multi-robot systems and (in a new chapter) human-robot interaction; and offers a "metaview" of how to design and evaluate autonomous systems and the ethical considerations in doing so. New material covers locomotion, simultaneous localization and mapping, human-robot interaction, machine learning, and ethics. Each chapter includes exercises, and many chapters provide case studies. Endnotes point to additional reading, highlight advanced topics, and offer robot trivia.

Ivozia Tanith Lee 2014-09-30 Nick Lewis certainly has no liking for his TV historian brother, Laurence. Aside from anything else Nick blames him for the death of their mother, the beautiful actress Claudia Martin. And so, is it possible the off-handedly childish trick played by Nick on Laurence really does cast some kind of curse? Bizarre and unpleasant things begin to happen, without a doubt. And Nick himself is hardly immune. As the pattern of his secure yet eccentric life starts to come undone, he finds himself without remedies. Where has Laurence vanished to? What is the creepy Mr Pond's part in it all? And who is the apparently sinister Kitty Price? Can repressed hatred cause such disruption, danger, even death? Or has the object caused it, as Nick pretended it could: that little ivory counter from a stolen drawer... This is probably not a supernatural story. It might be less unsettling if it was.

Day by Night Tanith Lee 2013-06-24 The planet did not rotate. On one side eternal day, the sun shining down hotly from the centre of the heavens. On the opposite side eternal night, the stars glowing coldly in the black and airless sky. Yet the planet had been colonised. In ages past civilisation had dug into the rock of the darkside and had thrived. Aristocrats vied with aristocrats, and the poor, as ever, struggled to keep home and body together against the ever-encroaching cold surface. To keep the lower classes happy, Vitra, the storyteller, spun romantic sagas on the popular network. She imagined a strange world on the sunside, inhabited by men and women enmeshed in crime and love, schemes and intrigues. Vitra believed she was making this up. But was she? Was there really another civilisation on the bright side and could it be that what she related was not fiction - but events which would inevitably send both worlds out of synch to mutual disaster?
